Signature Devices, Inc. and Innovo Technology Announce Development and Release of TruckIT App

The mobile marketing platform for food truck and restaurants increases sales real time

IRVINE, CA--(Marketwired - Jun 1, 2017)

Signature Devices, Inc. (OTC PINK: SDVI) today is announcing the revamping of its TruckIT app.

Innovo Technology, a leading software and hardware development company, will be finalizing the enhancements for the TruckIT application at the end of Q3 and relaunching it to take advantage of advances in Artificial Intelligence and Geofencing technologies developed by Innovo Technology. TruckIT is an app that is designed to notify customers when food trucks arrive in their area. Food Trucks push a physical beacon button that then initiates a sequence of events to push notifications to customers. The TruckIT app was originally merged into Innovo Technology because it was a perfect fit for Innovo Technology's vision of developing smart software running atop optimized hardware operated through cloud based apps utilizing neural Artificial Intelligence networks to create connected Internet of Things devices. TruckIT provided the app knowledge and cloud platform part of the equation.

This document may contain forward-looking statements, including information about future expectations, plans and prospects. In particular, when used in the preceding discussion, the words "believes," "expects," "intends," "plans," "anticipates," or "may," and similar conditional expressions are intended to identify forward-looking statements. Any statements made in this release other than those of historical fact, about an action, event or development, are forward looking statements. These statements involve known and unknown risks, uncertainties and other factors, which may cause the results to be materially different than those expressed or implied in such statements.
